BIG CLEAN-UP IN ALASKA.

ESTIMATED THAT \$9,000,000 WILL COME OUT THIS MONTH. ady Flow of Gold from the Blondike and

the Yukon Busy Season in the Lake Superior Copper District—Effect of the Smelter Strike on Colorado's Business. SEATTLE, Wash., July 10.—There is a steady w of gold from the mines of Alaska, both now of gold from the mines of Alaska, both placer and quartz mines being in full swing. The gold mills on Lougias Island are all in ac-tive operation and 880 stamps are dropping constantly, while the two mills in Silver Bow Basin and the thirty stamps at Sheep Creek are also pounding away. The mill of the Jualin Company and that of the Burnes's Bay Company are doing well. During the present month it is estimated that at least \$9,000,000 ill come out over the trails and by the way of St. Michael from the mines of the Yukon and undike. This is regarded as a very conser-

vative estimate. The Sea Level Mining Company, having demonstrated the permanent character of its ore body, has finally determined to order a mill for the reduction of ore. This is a free milling proposition that is regarded among the bis producers of southeastern Alaska.

Experts for the London syndicate, who hold a bond on the Pande gold mines near Sitka. are said to have reported favorably, but nothing is said regarding future operations. CALIFORNIA.

Los Angeles, July 8, -New York and Boston capital has been interested in the Centennial mine, near Dertown, Amador county, and it has been unwatered, the shaft is being cleaned out and it is now to be developed to the depth of 1.000 feet.

The ledge has been struck in the Oneida mine at a depth of 1.805 feet. The shaft is to be sunk to 2.000 feet. A good deal of money has been speat in the development of this property, which is owned by the English Rothproperty, which is dwided by the English Roth-schilds and the Seligman Brothers of San Fran-slaco. In sinking to 1,400 feet \$200,000 was expended. The Oneida lies northeast of the famous Kennedy.

At Handsburg, Kern county, work has been resumed on the old Butte property, with an output of about \$2,000 per week. From this time all the profits of the mine are to be expended in its development. A clean-up from the Munebaha mine has

eided \$22 per ton. A clean-up of 120 tons rom the Stanford yielded \$2,800. The Wedge ne has \$2,050 from thirty tons of ore. A recent milling from the Magganetta yielded an average of \$85 per ton.

Some remarkable developments are reported the Golden mine, near Callente. This claim; was located three years ago, but no more development work has been done on it until ately than was made necessary by law. But ledge has just been opened up and found to be sixty-five feet wide, mainly low-grade. free-milling rock, but with a two-foot streak through the centre that is exceedingly rich. It is estimated that there are in eight thousands of tons that it will pay to work. A large

The California Copper Company is preparing to erect a 100-ton smelter in Madera county. on the Fresno River. It is to be in operation on the 1st of October. The North Star Mines ompany. Nevada county, shipped bullion to the value of \$16,400 during the first balf of June. The company has struck rich ore in Stockbridge No. 15. The Pennsylvania Mining Company has declared dividend No. 30, of 205cents per share, \$10,300.

The Centennial mine, in Genesce Valley Plumas county, gives an instance of very cheap mining and militing. The ledge is six feet wide and the ore is mined and milled at a cost for

Another gold dredging machine is to be ouilt near Folsom, Sacramento county, where the Boston Exploration Company has secured 100 acres of Sallor Bar. The company has aldy had it prospected very thoroughly and has bonded and is prospecting several other properties in the vicinity, A gold brick weighing 130 ounces and worth 2,330, the result of two weeks' work, has been tent out by the O. K. mine, Virginis Dale dis-

NEVADA.

NEVADA.

VIRGINIA CITT, July 8.—Preparations are being made in the Consolidated California mine for more extended operations. The objective point is the 1.800 level. The work of reopening this level, through the winze from the 1.000 level, has been commenced.

Copper veins are being prospected on Grantle Creek, twenty-two miles from Golconda, where the Colossus Development Company of Chicago has thirty men employed. Other companes are also represented. A 100-ton copier smelting plant is to be installed at Solaville, Escieralda county.

A Hitchcock of San Francisco has taken a daylle. Essieralda county.

C.A. Hitchcock of San Francisco has taken a ninety-day bond for \$55,000 on the iron mines

The copper magnates have now turned their attention to the camps in Arizona. For some time the rich deposits of copper at Jerome have been under examination by experis. Senator W. A. Clarke of Montana is interested in the mines. Not far from Jerome are the towns of Clifton and Morenzi, where some of the richest copper mines in the world are located.

Many believe that Senator Clarke will com-bine with Heinze Brothers to fight Marcus Par's new company, or the trust, as it is called. If thatke sticks to his anti-trust sehti-ment the Clitton mines can make a large hole in the trust profits.

At Goloucia, seventeen miles from Winne-muca, the men operating the newly discovered brocerties are endeavoring to consolidate the companies. Morton Lindiey and W. A. King are at present in Chicago endeavoring to ac-complish the consolidation. These same men-have takes a bont on copper properties dis-covered at weeks as present the consolidation. compiled the consolidation. These same men-have takes a bond on copper properties dis-covered six weeks ago for \$80,000. If they are successful one of the largest companies in the Western country will be in operation here inside of six months with millions of tons of

inside of six months with millions of tons of good copper ore in sight.

Fitty miles west of here in the Jackson creek mountains a London syndicate headed by M. Frank is necestating with Sam Davis, blate Comstroller, for the purchase of some copper mines in his possession. This week the syndicate sentian expert. Oliver Roberts, to inspect the mines. After viewing the protesty he stated he was very much pleased with it. It is probable that he will make a favorable report.

A mining camp has been named Slegel in honor of Mr. Siegel of the Slegel-Cooper Company, it is boarded northeads of the Comstock, and this week no important strike was made in copper in that district, the ore running

bout 30 per cent.

Work on the Comstock progresses steadily. The official report from the Consolidated altorna and Virginia mine, in which the ambing operations are going on, is encourging. The high-grade ore developed above he 1.750 foot level dips below the track floor of that level, where there is a large area of un-explored ground, and invests with unusual in-terest the advance of the west cross-cut to be sent in on the 1.8sc foot level.

MEXICO.

GUAYMAN, INC.

GUATMAN, July S. Excellent reports are coming from the Moctezuma mining district, in the State of Schort. Over 6901 locations have recently been made and new strikes are frequently reported. At La California Camp development work is giving good results and averal properties have recently been bonded. A rich conter lead has been struck by J. M. Hillyer and G. W. Beard on the Arroyo del Allson, near the Creston de Oro mine. A general assay of float and an average cropping of four feet of feduc gave returns of \$413 in gold. 25 ounces of allser and 22 per cent, of copper to the test of silver and 22 per cent, of copper to the ton. This find is made of more value by its accessibility to the copper plant being erected at Nacosari.

Saltz Larg. July 10. The mast week closed with a good output from the mines throughout the State over 200 cars of ore arrived at the local samples works. About 300 more cars went to the smellers. Thit is alone contributed the smellers. Thit is alone contributed the smellers. Thit is alone contributed at the good sampling rooms of the Gancoldates that say of the sampling rooms of the Gancoldates than as thy Smelling and Register. statue of a typical American gir! for lexhibition at the Paris Exposition next year. Mr. Hisbee was successful in his undertaking, and says that the statue will cost in the neighborhood of \$600,000.

Dividends amounting to \$152,500 were paid to-day, divided as follows: Mercur Mining Company :\$50,000; Grand Central, \$37,500; Silver King, \$50,000; Builton Beck, \$10,000; Bwansea, \$5,000.

ARIZONA.

Tucson, July 7.—F. B. Wightman, who read

Tucson, July 7.—F. B. Wightman, who re-cently returned from the Cananea mines. In northern Sonora, Mexico, reports that 200 men are at work in the mines and that two car-loads of builton have been slitpped since June 15. The ore goes as high as 55 per cent. cop-

loads of buillon have been shipped since June 15. The ore goes as high as 55 per cent. copper.

It is reported that E. P. Holliday recently struck ore in the Gold Leaf mine. Hassavamps district, which goes \$100 per ton. The mine is located near the farsous Jersey Lily.

In the Crack mine Bob Knowles and Al Lewis have struck a fine body of ore which runs as high as 45 per cent. copper and \$65 in gold per ton. This rich ore was encountered at a depth of eighty feet and ore is being taken out for shipment.

The Arizona Copper Company has just completed its large elevator wheel for lifting sing into a large flume which will carry it out and over the present surface of the river bed. The wheel has a lifting capacity of 250 tons of slag every lwenty-four hours.

It is reported that the Nicholson Gold Mining Company has sold its properties in the Cave Creek district, known as the Portmanteau group, for \$709,000 eash. It is estimated that there is in sight an ore body which in value is \$500,000 in excess of the purchase price. Considerable development work has been done on the group in the past year and it is understood that machinery will be at once erected and active operations begun.

that machinery will be at once erected and active operations begun.

An important strike was recently made in the Blue Jay mins. A new shaft has been suns further up the mountain from the main shaft and in this a fine vein of ore was found. A sample from what appeared to be the poorest of the ore was assayed and found to run 170 ounces to the ton in silver. The mine is one of the very best silver properties near here, and aside from the silver the ore runs \$4 wald ner ton.

gold per ton.

J. W. Lawson, representing New York capitalists, has lately accured a ninety-day option on thirty or more wolfram claims in the Busselville district.

WASHINGTON.

selville district.

WASHINOTON.

SEATTLE. July 10.—In the Sunset group. Troublesome district, water has been encountered in the main shaft and progress has been somewhat interrupted. A large body of hornite that will go fully \$100 per ton has been opened and a larger body of chalso-murite has been struck, either one of which is large snough to constitute a mine. Shipments to the Everett smeiter will begin this month and continue during the season. All the output has been contracted for by the smeiter at that place. Other properties in the district are working small forces and are encountering cresimilar in character to that of the Sunset.

A report is current again that the work of restoring the Monie Cristo Italiway will begin this month, now that all the interests have fallen into the hands of the Rockefellers, who advanced the money for opening the Monte Cristo mines and for constructing the railroad. This will virtually come four districts—Monte Cristo, Silverton, Goat Lake and Sauk—and will give hundreds of miners employment.

In the Washington-Anaconda group, in Beckler River district, a strike has been made on the Anaconda in a tunnel that is being run on the vein,. It is bornite ore carrying values in copper, gold and silver to the amount of F100 per ton. There is between one and two facts of this class of ore, all of which will bear shipping to the Fuget Sound smelters. This class of ore, while common to the Index country west of Beckler, has not been met here before, and gives great encouragement to the people who have this group under bond.

BRITTER COLUMBIA.

BRITISH COLUMBIA. SEATTLE, Wash., July 10.—The Exploration Company at Fairfield is operating a ten-stamp mill and making a profit of about \$1,500 monthly on the output of mill and mine. At the depth of 400 feet in the shaft the isdge has the deuth of 400 feet in the shaft the ledge has been lost, and the men are now prospecting for it. They are working on cre above the 400 level and are pleased with the results, but would be better pleased if the ore would continue to the deen. Out of 4.700 tons they obtained 2.157 ounces gold and 4.189 ounces diver, or nearly \$50,000.

On the west coast of Vancouver Island the Wisconsin syndicate which owns the Syachart mines a making good progress in developing

mines is making good progress in developing the group on the brow of Seachart Mountain. the group on the brow of Seachart Mountain. This property was originally located as being extremely valuable for its high-grade Bessemer iron, the surface ore going over 62 per cent, metallic iron, carrying low in silica sulphur and phosphorus, and by reason of this was held at a high figure when examined by the Japanese Government. Becently a chance in character of the ore has taken place, and, while valuable enough as iron ore simply, it was found still more valuable for the copper it contained. This transformation has been gradual and not to the liking of the owners, who were satisfied with the iron as originally discovered. There is a great deal of bornite carrying 30 to 40 per cent, copper, with good values in gold and silver. The mines are 103 miles from Victoria and are very accessible by

IDAHO.

IDAHO CITT. July 8.—Over fifty men are now employed in the Washington mine in Gambrians district. A drift has been rus from the bottom of the 300-foot shaft, cutting the gold ledge, which is found to be good. Good ore is also coming out of the silver mine worked through the same shaft.

William Williamson yesterday secured a working bond from O. A. Duquette and Julius Linstead on the Illinois, in Gambrians district. He left for Spokane. Wash. this morning to complete arrangements for immediately putting in machinery for sinking a shaft to the depth of at least 300 feet. The Illinois, being in a flat section where there is considerable water, was never worked to a death of more than seventy-five feet in any place, yet it has turned out over \$250,000. The vein is from twenty to forty feet wide and is half a mile turned out over \$250,000

turned out over \$250,000. The vein is from twenty to forty feet wide and is half a mile west of and on the same ledge as the Lucky Boy, which is turning out so well.

The Stephens Brothers are running a tunnel to cut the Klondike, six miles west of idaho City, to the death of 170 feet. This ledge is eight feet wide at the death of fifty feet and the ore good in free gold.

Three gold quartz mines lately discovered on Willow Creek, four miles west of this place, are turning out very rich ore.

Work is progressing raidly on the new dredge the New England Company is to use on More Creek, a short distance above the Warm Springs.

More Creek, a such a special point of a large and the such a large tract of ground on More Creek, ten miles below here, has the ditches dug and has commenced the construction of a bedrock flume.

below here, has the ditches dug and has consmenced the construction of a bedrock flume.

THE LAKE REGION.

DULUTH, Minn., July 10.—The most interesting matter connected with the iron ore mining at present its the encormous movement of ore to the lower lakes from Lake Superior migs. This movement has now reached a total of about 6.850,000 net tons, just about haif that of all last year.

There are now under construction at lake shisvards vessels for the ore trade that will have a carrying capacity of more than 2.569,000 tons in a single season, and these are coming into use week by week. Many of them will be in commission before this fall. All the ships now affect are cart, than a year ago, by reason of the deeper draught in connecting lake channels, and there is now no fear, as earlier in the year, of a scarcity of ships to do the work of the year.

Iron ore miners are not now selling any ore but they are figuring on the price they will charge next year, and this is quite likely to be just about \$1 higher than last spring. Standard ores will bring from \$3.50 for Mesabas to \$4.50 for old range ores of good quality. Sales of millions of tons were made the past spring for from \$2.20 for Mesaba to 55.50 for old ranges.

Denials are made of the sale of the lease of the great Chapin from mine of the Menominee range, but it is a fact, as stated in this correspondence two weeks ago, that the mine has actually been sold. The National Steel Dominany is the purchaser and paid \$3.750,000. The mine includes the Hamilton and Ludington properties, the latter the deepest mine in the lake country, and the three contain enormous reserves of ore.

The Carregie Company has found a new and very promising lead of ore in the East Nortle mine, in its stock julies at Ironwood and one at Bessemer, and is reducing its ore on surface with argent repolity. It has closed a purchase of a large and valuable tract on the Vermillor range, east of Ely, that it has been exploring for a year or more. Yery heavy and extensive machinery riants are t

machinery plants are to be installed at its Min-nesota mines at once, and the entire length of two and a half miles on the strike of the ore lode covered by its ownership is to be con-nected as one mine.

LAKE SUPERIOR COPPER.

Houghton, Mich., July 15.—There is now a sufficient supply of common labor in the copper district, but there is yet demand for skilled workmen of practically all mechanical and mining trades. The opening of more than a score of new mines, each employing from 40 to 1.000 men, has rendered the demand for skilled miners an insaticule one. As a consequence, the fron ranges, lying conveniently near, were drawn upon for men, until the iron ore producers were forwed to advance wages to figures not naid for many years previously. Miners are now being drawn in small numbers from all American mining fields. Mrom 'Europe, and even from South Africa, where there

MINING MACHINERY, FRASER & CHALMERS, as Broadway, New York, manufacturers of ming and snellting machinery. Estimates on mining milling and smelting supplies promptly furnished. MINING, MILLING, BMELTING AND CONCEN-

CO., ROOM 1111, 26 CORTLANDT ST., NEW YORK.

TRATING MACHINERY, CORLISS ENGINES;

are thousands of workmen who have at some time been employed in the various mining fields of the United States.

In addition to an increase of some 4,000 men Jirsetls employed by the mines, there has been a remarkable increase in forces by nearly every other industry in the district, led by the building trades. Nearly 1,000 dwellings are being erected this year in Calumet and its suburbs, a racord which will be excelled only by Detroit among Michigan cities.

The Phonix mine is being rectened and in addition to copper is showing silver in considerable quantiles. Several of the older mines of Keweenaw and Ontonigon counties were notable producers of silver, chief among the number being the Minnesota. Cliff and Phonix. The Cliff is almost the only mise once prominent in the district which is still idle. It was opened on a fissure vein, which was worked out, or at least was considered exhausted by the management when the mine was closed down some thirty years axo. Many miners who worked in the property shortly previous to its abandonment still believe good previous to its abandonment still relieve scale copper ground remains to be opened in this property. The Cliff was the first dividend payer of the lake district, distributing its first payment of profits in 1840 and its last divi-dend in liquidation just thirty years later, dur-ing which period total dividends of \$2.518.420 were paid, while the original investment was but \$111.000.

were said, while the original investment was but \$111.000.

The Minnesota mine was also opened on a fissure vein, surposed to have been worked out, but there are miners still living who assert with confidence that at least one considerable mass of native copper remains in the old workings untouched and its existence known to but few. The Minnesota property is again being worked, under the name of the Michigan, but a new mine is being developed on an amygdaloid idde known as the Calco, which is proving rich beyond the expectations of the most sangune.

COLORADO.

made to reopen the National mine, adjoining the Michigan, which will greatly help Rockland.

COLORADO.

DENVER, July 12.—The strike situation has alimmered down to a contest between the American Smelter Comvany and its employees at Denver and Pueblo, the employees being backed and advised by the State Federation of Lator and officials of the Western Federation of Lator and officials of the Western Federation of Miners. In all the camps the mines are generally working upon agreements made between the observors and the miners as to the hour wage. The smelters declare they will not recognize the federation, as that would bring to the State the same condition of salars existing in Montana and Idaho. The smelters are willing to confer with the employees, and even with officers of a local union, but if this means a recognition of the federation no settlement can be made.

An effort was made last week to onen the Ellers smelter at Pueblo, and for several days a full force of men was at work. Near the Ellers smelter is the Guggenheim smelter, which is not in the so-called trust, and where amicable arrangements were made for an eight-hour day at an hour rate which was higher than the agreement under which employees of the Fillers smelter were working. On Friday night a large body of men from the Guggenheim smelter went over to the Ellers smelter, and by threats and some demonstrations succeeded in inducing the employees there to quit work, resulting in the chaing down of the Ellers smelter. The present, situation is therefore very uncertain. Meanwhile the Guggenheim smelter is running at full capacity, and the chorination, cyanide and stamp mills have all the work they can attend to.

Owing to the difficulty of operating the Newcastle coal mines, near Gleuwood Springs, because of gases, the Colorado Fuel and Iron Company has decided to abandon the property. There have been many fatal accidents in the Newcastle coal mines, near Gleuwood Springs, because of gases, the Colorado Fuel and Iron Company will be connected with This company is said to make a saving of 85 per cent, of the gold found in the ore. If this chlorination plant proves successful the new camp of Eldora will have a most promising

camp of Edora will have a most promising mining boom.

The drainage of the big mines at Creede through the Nelson tunnel progresses satisfacorily. During the week the water in the Amethyst has lowered over 100 feet. A force of men is now at work on this mine making general repairs and clearing the old workings so far drained. These workings have been under water for five years and shoments will begin this month from the under levels.

A rich strike of copper ore is reported from the Angeli mine in the Paradox Valley district. The first shipment out of the Paradox district has been made. It comes from the Sunrise mine. It consists of a carlend of copper glance and carbonate, containing more or less silver. Upon the smelter returns of this shipment much depends. If it proves as rich as is promised by the assays the Paradox included.

shimment much depends. If it proves as rich as is promised by the assays the Paradox copper district will be the scene of a lively boom this year.

Another new copper district has been opened in the Blue Mountains south of Lake George in Park county, five miles west of Florrissant. The existence of copper in this locality has been known for twenty-five years, and in 1874 several waxon loais of the ore were hauled to Denver. The low price of copper at that time and the long haul prevented further developopment. A Crimie Creek miner has larely opened un two claims where he has found an outeropping of fine copper ore. At another claim a shaft has been sent down eighty-five feet, developing a twolve-inch vein of copper glance. No shibments have yet been made.

Colobado Sprixos, July 16.—The strike made by the Princess Alice Gold Mining Company of Buffolo. N. Y. in the Lafayette mine remains the sensation of the Cripple Creek camp. Three assays have been reported—\$10,720, \$78,401 and \$105,881. A fourth assay shows a value of \$130,000. The seam, beginning at knife-blade thickness, was six inches thick at twenty feet, the average being four. The seam runs through a fourfeen-inch vein which assays \$745. The fourth assay was obtained some days after the first three. All have been verified by Assayer P. Schuch, Jr. of Crimple Creek. At another level in the mine bonanzs ore has been encountered. A ton now ready for shipment is estimated to be worth \$100,000, while two or three others are placed at \$50,000 seach. The first shipment will pay for the Rubie mine, which has been bonded to the Princess Alice Company for \$95,000. The seam of bonanza ore enters the Rubie at twenty feet. The bond was secured just before the strike was made.

The Princess Alice is the only company operated by women, though there are many operated by women, though there are many operated by women, though there are many operated by wowelving new ore bodies. The company operated by women, though there are many operated by wowelving new ore bodies. The

Missoural-Ransas.

Joplin, Mo., July 14.—After a two weeks' shut-down, to comply with the request of the Missouri-Kansas Zinc Missers' Association, the various mines in the zinc belt resumed operations hast Monday, and the result was an immense output of zinc and lead ore for the week. The mine owners or producers of zinc ore igractically won their fight against the zinc smelters and by shutting down for two weeks caused a shortage of ore and forced the smelters to pay schedule prices.

The Zinc Miners' Association did not find it necessary to ship any of the ore to Europe, all of the 5,000 tons held for export having been bought at association prices by the American smelters.

Last week the smelters paid the schedule in all of the mining camps, and in some instances fancy zinc ore brought 50 cents over schedule prices. MISSOURI-RANSAS. prices.

The top price paid for zinc ore for the week ending July 15 was \$44.50 per ton for ore in the blo ending July 10, was seed to be took the bin.

Lead ore continued to sell at \$20 per thousand pounds, delivered at the lead works or on board cars for shipment to outside smelters, for fluxing.

A great deal of prospecting is being done in all parts of the mining district, and several big strikes have been made.

If You Haven't Tried It Before, Begin now, and learn what other leading summer resort advectiaers have discovered through advertis-ing in THE SUN. The result, a desirable, well-paying clientage.—Adv. ILL LUCK DOGS GLOISTEIN.

LATEST TRIP OF HIS FISHING CLUB MAY BE ITS LAST.

He Called Off the Excursion, but Sent the Notices to Himself-Then He Led the Members Across a Trestle-Train Came Along and They Had to Jump Overboard. The annual fishing expedition of the Gloistein Fishing Club, which lasted from early on Saturday morning until yesterday morning, was, as usual, attended by disasters, alleged to be the fault of August J. Gloistein, the President. If the predictions and threats of the leading members mean anything the club has

held its last excursion. The arrangements for the expedition this year were once more intrusted to Gloistein, despite past disasters. He conducted some liter, who keeps a small hotel close to the trestle of the Long Island Railroad near Long Beach, and here a question of veracity arises says that Molliter agreed to have a vacht ready for the fifty members of the club at Moiliter's Hotel early on Saturday morning. Molliter says he didn't. On Friday Gloistein telephoned to Molliter and asked him if the yacht would be ready. He learned that it would not, because another club had secured it. The argument over the telephone after this intelligence had been communicated became so heated that the manager of the central office in New York cut off the connection.
"Mein Gott! I vill haf to notify der mem-

bers or der vill pe droubles by der morning," said Gloistein to the crowd which had listened to his end of the argument. "Dey vill all be py Molliter's in der mornings mit heer undt cheese undt pumbernickel, undt if der pe no yaent I vill pe blamed."

He procured fifty postal cards and wrote on each a characteristic notification that the picnic was off, but he was so excited that instead of addressing the cards to the members he of addressing the cards to the members he wrote his own name and address on all of them. Then he put them in a mailbox.

Early on Saturday morning, to his consternation, the postal cards all came back to him in his saloon. Gloistein hurriedly grabbed his hat, coat and fishing tackle and departed.

"I must go by Long Beach. Her glub vill be dere, undt I vill ged id unless I ged another boat," he shouted to his bartender as he ran

bont," he should be also had reported at out.

In the meantime the club had reported at Molliter's and had held an indignation meeting. When Giolatein appeared the angry members threatened to throw him overboard.

"Vait a minute! Vait a minute!" he shouted to them. "Gome mit me down on der dressle undt I vill take you to a blace vere I vill ged another bont."

arother boat."

This statement partly appeased the crowd.

undt I vill take you to a blace vere I vill ged another boat."

This statement partly appeased the crowd, and, with Gloistein in the lead, they started along the trestle in single file. Now, the trestle has one track, and on each side of it there is only about eleven inches of walking space. When the crowd reached the middle of the trestle great consternation was caused when Pat Connolly, the Mayor of Poverty Hollow, shouted: Begorn, boys, here come a train. We will all be kilt."

"Loog owid! loog owid!" shouted Gloistein. Of the fifty members present twenty-nine were eleman saloon keepers, who on account of their literal proportions stood no show of staying on the trestle while the train passed. The others by standing up straight could remain with slight danger. There was nothing left for the twenty-nine fat members to do but to jump overheard. The tide was low and there was only about two feet of water at the point, but there was plenty of mud.

The fat men accepted the inevitable with surprising and indicrous alacrity. Korpstein, the undertaker, whe weight 250 pounds, landed in the water on his stomach. Fred Miller. Treasurer of the Beer Creek Association, fell lackward in the water in his excitoment. Fat Connolly dived headlirst and landed on top of Miller, and the two men had a fistic encounter in the water. Bismarck Roscoe of Broome street sank in the mud and the water was up to his neck.

When the train had passed those who remained on the trestle assisted in pulling the fat men out of the water. Gloistein, who had been able to stand on the trestle, was seen running along the trestle toward the Long Beach station. The rest of the members sought a hotel, and after drying and cleaning their clothes went fishing anyway, but they went out in separate rowboats.

When most of them returned yesterday Gloistein could not be found at his hotel.

BOOM IN COAL AND COKE.

Unprecedented Activity in the Coal Mining Districts of West Virginia. WHEELING, W. Va., July 16,-The average oal and coke producer in the big fields of West Virginia expresses no surprise at ordinary past two weeks are sources of astonishment to most of the operators. Business was never so good and the boom is without precedent. For two days more than 800 cars of coal blocked traffic on the Raltimors and Ohio Raliway at Fairmont. W. Va. The hard-worked freight crews did their best to relieve the congestion, but as fast as they made up trains and sent them on their way more coal-laden cars were rolled into the gaps. From every district of the State come the same sort of reports. Coke producers are turning out more by 15 per cent than they ever did before, and prices have advanced snarply.
In the northern part of the State new coal enterprises involving the expenditure of much capital are being faunched, and most of them are already in tangible shape.

ROWDIES THRASH A POLICEMAN.

They Take Away His Shield but Feel His

Nightstick Later. Policeman Foley of the East Twenty-second street station saw several men raising a disturbance at Fourteenth street and Avenue B at 3 o'clock yesterday morning and ordered them to disperse. One of them hit him in the stomach, doubling him up, and before he could recover another tripped him and he went down on the sidewalk. One of the rowlies took away his shield and another kicked him in the

Each of them was taking a whack at him when Policeman Smith came along and sailed in with his nightstick. Foley got up to help, and the two arrested Michael Mann of 277 Avenue B and William Woods of 543 East Thir-teenth street. They were held in the Yorkville Police Court for examination to-day on charges of felonious assault.

Mr. Bodley Receives a Call.

The Rev. Harry I. Bodiey, acting secretary to Bishop Potter during the absence of the Rev. Dr. George F. Nelson, who has gene to Alaska Dr. George F. Neison, who has gone to Alaska as chaplain of the Harriman Exploration Ex-pedition, has received a call to the rectorship of St. Mark's Church, New Britain, Conn. Mr. Bodley is expected to assume charge of his new duties next month. Dr. Neison will re-turn early in August.

The Weather.

A more sultry day than yesterday seldom comes to New York. The humidity ranged nearly all day between 95 and 100 per cent., with only a light southwesterly breeze.

The excessive humidity was caused by an area of low pressure which spread over this section, the lake regions and the New England States. Heavy show-ers fell in the early morning and light showers in the afternoon. Showers fell in the Ohio Valley, the lake regions and New England; elsewhere the weather was generally fair.

It was warmer in all the Atlantic States north of

Florids and cooler in the Northwest and the upper Mississippi Valley. In this city the highest temperature was 83°: total rainfall baif an inch; wind light southwest; barometer, corrected to read to sea level, at 8 A. M. 29.91.

8 P. M. 29.86. The temperature as recorded by the official ther mometer and also by THE SUN's thermometer at the

strest level is shown in the annexed table:

- Official - Sun's | 1899 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | 1898 | WASHINGTON PORECAST FOR MONDAY. SYRUP OF FIGS MANUFACTURED BY CALIFORNIA FIG SYRUP CO. EF NOTE THE NAME.

MISSING EXPRESS THIEF TURNS UP. Caught Stealing Lead Pipe After Getting

Away with Twe Londs of Goods. In John MacAgnes, 27 years old, of 208 Eighth avenue, who was caught by Detectives Baxter and Livingston of the West Twentieth street station in the act of stealing lead pipe from an unoccupied building last Friday, the colice have discovered a thief who is charged with having stolen two wagon loads of goods, and for whom they have been looking since December last

J. Breedinger, an expressman of 528 West

Twenty-second street, who has a contract with several department stores to deliver goods to their customers in New Jersey, at the close of last year said that one of his drivers, whom he knew as John Davis, had received a wagon load of goods from Macy & Co. for delivery to a number of persons in New Jersey and that all trace had been lost of him, the horse and wagon and the goods. The property was valued at \$3,000. In looking up Davis's antecedents the Central Office detectives discovered that the bond he had given to the express people was forged. It was signed by Mrs. Eubank, who was supposed to live at 337 West Twenty-eighth street. When the bond was made out before Commissioner of Deeds Cannevan of 111 Ninth avenue, a woman introduced herself as Mrs. Eubank and swore to being properly qualified as bondswoman.

The lost horse and wagon were subsequently found near Hackensack, but the driver and the goods remained undiscovered. Two months later Herbert Shear, an expressman of West Fourteenth street, and Sixth avenue, complained that one of his drivers, who was easily identified as Davis, had vanished with three trunks, a value and a hatbox, belonging to George W, Mesarve of 79 Leonard street, and valued with their contents at \$500, and the trunk of a brother of W. D. Martin of 87 Seventh avenue, valued at \$150. The drivers horse and wagon were picked up by a bleyele policeman, but nothing more was heard of Davis until, when Mackenes was paraded before the Central Office detectives he was recognized as the missing thlef.

The prisoner was later identified by his former employers, and he was arraigned yesterday morning before Magistrate Mott in the Jefferson Market Police Court on a charge of larceny. The Magistrate held him in \$2,000 hall for examination on Friday. William Marsh, an ex-policeman, who was with Davis when he was arraigned for lack of evidence against him. trace had been lost of him, the horse and wagon and the goods. The property was

Orange's New Free Library.

OBANGE, N. J., July 16 .- The Board of Trus tees of the Orange Free Library has decided to purchase ninety feet of land adjoining the present building as a site for the memorial library which Mr. and Mrs. Joseph Whipple Stickler are to build-in honor of their son, the late Dr. Joseph William Stickler. The old building will be torn down and part of the new building will stand on its site so that when completed it will be in the centre of a plot having 136 feet frontage.
